

IT SECURITY TEST / CYBERSECURITY

OUR COMMITMENT: QUALITY COST DEADLINE

IT SECURITY TEST / CYBERSECURITY

YOUR NEED

You have a digital product and/or IT system and would like to :

- test its security reliability and identify the flaws
- identify the vulnerabilities and understand how to mitigate them
- evaluate the cyber resilience of your IT solution

You purchased a new product and would like to test it to reduce the risk of cyber attacks.

OUR SERVICE

We collaborate with our historical partner specialised in cybersecurity which is located in Ukraine. They realise the analysis according to such methodologies as PTES (Penetration Testing Execution Standard), OWASP Testing Guide and NIST SP800-115 (Technical Guide to Information Security Testing and Assessment). We'll follow you from exact need identification till realisation of detailed report and implementation of corrective actions.

IT security test / cybersecurity Operating mode

SCOPING & CONTRACT

Together with our partner you will define the project scope, technical details, deadline and budget

PREPARATION

Based on your needs the partner will define the test parameters and set up a suitable team. They will collect necessary data based on the technics of data mining like Open-source Intelligence (OSINT)

ANALYSIS

The team defines the vulnerability tools and fulfill a profound analysis. They validate the results and identify the potential gaps and possible security flaws. They can also test the defense mechanisms of your system

REPORTING & RECOMMENDATIONS

The team will provide a detailed report with all the risks identified and the mitigation plan to implement

A man wearing a headset is shown in profile, working at a computer in an office. The background is a bright, sunlit office space with a desk, a laptop, and a monitor. The man is wearing a red and blue plaid shirt. The overall atmosphere is professional and focused.
